

Appendix A

DISCOVERY GREEN EVENT VENUES

Amphitheater Area (1)

The following two spaces may be rented separately or together.

Fondren Performance Space and Anheuser-Busch Stage (1A-1E): Fondren Performance Space is a sloped lawn with no fixed seats; its estimated audience capacity of 1,000 (1A) to 2,000 (1B) varies based on event sight line requirements. Anheuser-Busch Stage (1C) is a covered 30' x 40' platform and an uncovered 19' x 45' wing; Saberion Plaza (1D) surrounding the stage may be rented for an additional fee. Separate dressing rooms (1E) adjacent to the stage also may be rented. Other than Saberion Plaza, each feature may be rented individually.

Lindsey Waterside Landing (1F and 1G): A 70' x 120' lawn with a tent area of 50' x 80' (4000 sq. ft.), has tented capacity of 266 and untented estimated capacity of 450 to 650. Event restrooms (RR2) with three toilet fixtures each for men and women are located nearby and are available for rent. Potable water, 3-phase & limited 120-v power, and data/phone pullbox are available. Events will be scheduled to allow the lawn to recover between events, and the lawn may be unavailable in wet weather and shortly after it has been resodded.

Jones Lawn (2)

This lawn, approximately 160' x 400', is for recreational use and is only available for events consistent with the Park's mission. Estimated capacity is 5,000 to 6,000 attendees, audience-style seating. The Park's public restrooms (RR1) are located near the Jones Lawn but are not adequate for large crowds. Three-phase & limited 120-v power, and data/phone pullbox are available. Adjacent pavements are not included in the venue except as noted in the Fee Schedule. A surcharge is applied if resodding is required. Events will be scheduled to allow the lawn to recover between events, and the lawn may be unavailable in wet weather and shortly after it has been resodded. Due to the lawn's location over the underground garage, equipment, tent and other loads are strictly limited.

Wortham Foundation Gardens (3)

Some events may use of the entire garden, including pavements. There are no public restrooms in this area.

Grace Event Lawn (3A): A 10,000 sq. ft. lawn area adjacent to The Grove. Permanent anchors support standard party tents up to 66' x 132'. Estimated capacity is 500 to 800 attendees without a tent and less with a tent. Events not catered by The Grove must be set back 40-feet from the west end of the Grace Event Lawn, and tent length is reduced to 100-feet. Adjacent pavements are not included in the venue. Potable water, 3-phase & limited 120 volt power, and phone/data pullbox are available. Events will be scheduled to allow the lawn to recover between events, and the lawn may be unavailable in wet weather and shortly after it has been resodded.

Maconda's Grove (3B): This crushed granite area is approximately 80' x 135' (10,800 sq. ft) and is shaded by 15 loblolly pines. There are two (2) bocce courts with limestone benches in this area. Estimated capacity is 450 to 750 attendees. There is access to 120 volt power. Due to the trees, only 10-foot wide tents can be used.

Transier Bandstand (3C): A small bandstand facing both areas described above. Covered area is 12-feet x 12-feet, and the entire platform is 14.5-feet x 16-feet. The bandstand platform is 18-inches above the ground.

Andrea and Bill White Promenade (4)

The Andrea and Bill White Promenade is a 30-foot wide by 280-foot long paved walkway that can handle markets, arts and crafts exhibits, and other events that require a solid surface for tents or vehicular access. The Conservancy has sixteen 10' x 20' tents with permanent anchors in the pavement available for rent. The Park's public restrooms (RR1) are located nearby in the Alkek Building. Public access along the Promenade must be maintained.

Birthday Parties and Other Smaller Events (5)

Two areas of the Park (5A and 5B) are available on shorter notice for small birthday parties and other smaller events, generally during the week due to weekend crowds. Please see information in the separate guide for these areas.
